

515.117(h)(1) Support Documentation

When the contract holder installs a conservation practice on his own, the maximum allowable charge for common, unskilled labor is \$12 per hour. This amount is based on agricultural wage rates for experienced farm labor in Wisconsin, posted on the Wisconsin Department of Development website.

This rate will remain in effect until replaced. No other rates for unskilled labor are authorized.

This is not intended to cover equipment operations (man with bobcat, etc.), or skilled labor, nor is it intended to cover any work done by an outside contractor.
